

2018 Alfalfa Insecticide Assurance Program

Program Description:

An early application of Mustang® Maxx insecticide, Stallion® brand insecticide or Steward® EC insecticide for control of alfalfa weevils followed by a later application of Steward EC insecticide with residual control is a best practice for effective control in first cutting alfalfa hay.

When one of the following combinations of treatments are applied within the labeled timing and a third application is required prior to making the first cutting due to economical infestation of weevils – such determination shall be made solely by an FMC representative or an FMC authorized agent – FMC will cover up to \$4.00/A for the third treatment.

Qualifying Product	Assurance Benefit
Steward EC insecticide 5.3 oz./A followed by Steward EC insecticide 6 oz./A*	Up to \$4.00/A
Mustang Maxx insecticide 4 oz./A followed by Steward EC insecticide 6 oz./A	
Stallion brand insecticide 11.75 oz./A followed by Steward EC insecticide 6 oz./A	

*Do not apply more than 45 fl. oz. of Steward EC insecticide or 0.44 lbs. a.i. of indoxacarb containing products per acre per year. Apply no more than 11.3 fl. oz. of Steward EC insecticide or 0.11 lbs. a.i. of indoxacarb containing products per cutting.

Program Requirements:

1. Must use minimum use rates listed in the chart
2. Products must be applied according to label use directions or 2(ee) recommendations

Program Period: March 1, 2018 – May 31, 2018

Program Geography: Arizona, Colorado, Idaho, Kansas, Missouri, Montana, Nebraska, Nevada, New Mexico, Oklahoma, Oregon, Utah and Wyoming
